PER CURIAM.

Inmate Bedford Mitchell filed a 42 U.S.C. § 1983 action against Paula Myers, Director of Nursing at Missouri's Northeast Correctional Center, claiming she was deliberately indifferent to Mitchell's medical needs during treatment of his toe nail fungus. The district court granted Myers summary judgment and Mitchell appeals. Having carefully reviewed the record and the parties' briefs, we conclude summary judgment was properly granted and we affirm for the reasons stated in the magistrate judge's thorough opinion. See 8th Cir. R. 47B.
